Responsible Minerals / Conflict Minerals Statement – GARO Group 2026

GARO is committed to responsible sourcing and ethical business practices throughout our supply chain.

GARO works with suppliers to identify and address risks related to the sourcing of minerals, including **tin, tantalum, tungsten and gold (3TG)** and other minerals where relevant.

We expect our suppliers to support responsible sourcing practices and to provide relevant supply-chain information when requested, including information based on recognised industry reporting frameworks such as the **Conflict Minerals Reporting Template (CMRT)**.

GARO continuously evaluates relevant regulatory and customer requirements and works to improve transparency in our mineral supply chain.
